The third issue of *Emerging Materials Research* to publish in 2020 is ready for our readers. As we expected, the number of submissions to this journal increased and we are sorry that we could not accept many of those submissions. We are thankful to contributors and we are expecting to receive more submissions in the future. This will lead to an improvement in the standard of *Emerging Materials Research* in the future.

In the third issue of 2020, there are 50 valuable papers; I am sure each paper will be helpful for our readers and will make a significant contribution to the field of materials research.

I extend my gratitude to the authors, reviewers, related members of the Editorial Board and Editorial staff for their contributions and making the publication of this issue possible.
