Erratum: The Roman bridge of Segura, Spain, and the importance of historical studies for conservation works

Pedro Plasencia-Lozano PhD, ICCP, MU
Senior Lecturer, Universidad de Oviedo, Mieres, Spain

ICE Publishing regrets the misleading inclusion of ‘Spain’ as the location of the Roman bridge of Segura in the title, abstract and Introduction of this paper, published in *Engineering History and Heritage* **170**(4): 178–188, <https://doi.org/10.1680/jenhh.17.00009>.

The title of this paper was altered to include ‘Spain’ following the Editorial process and this was retained by the Production team.

Segura is a village located in Portugal; the Roman bridge of Segura crosses the Spanish/Portuguese border between Alcántara, Spain and Segura, Portugal.

The Editorial and Production teams at ICE Publishing sincerely apologise for this error and any inconvenience caused.
