Corrigendum: Offshore pile load tests in Chalk to support the design of jacket foundations

Magnus Geduhn Dr-Ing

Senior Project Manager, Geotechnical Engineering, Ramboll, Hamburg, Germany (corresponding author: magnus.geduhn@ramboll.com)

Pedro Barbosa MSc

Senior Geotechnical Engineer, Iberdrola, London, UK

Jan Dührkop Dr-Ing

Chief Consultant, Geotechnical Engineering, Ramboll, Hamburg, Germany

Anders H. Augustesen PhD

Lead Geotechnical Specialist, Geotechnical Site Assessment, Ørsted, Fredericia, Denmark; formerly Geotechnical Chief Specialist, Marine & Foundation Engineering, COWI, Aalborg, Denmark

Martin U. Østergaard MSc

Geotechnical Specialist, Marine & Foundation Engineering, COWI, Aalborg, Denmark

Jørgen S. Steenfelt PhD

Technical Director, Marine & Foundation Engineering, COWI, Kongens Lyngby, Denmark

The authors regret that following ahead of print publication of the article by Geduhn *et al.* (2018) on 28 August 2018, it was identified that three names – Anders H. Augustesen, Martin U. Østergaard and Jørgen S. Steenfelt – were omitted from the list of authors. Their affiliation details are provided in the author list of this correction.

The authors also wish to add four references and their citations to the article, as detailed below.

- (i) Dührkop *et al.* (2014) should be cited in section 3 ('Geotechnical properties of Chalk').
- (ii) Augustesen *et al.* (2015) and Dührkop *et al.* (2015) should be cited in section 3.2 ('Strength properties'), in the paragraph preceding Equation 1.
- (iii) Augustesen *et al.* (2015) should be cited in section 3.2 ('Strength properties'), in the second paragraph below Figure 3.
- (iv) Geduhn *et al.* (2017) should be cited in the caption of Figure 6.
- (v) Augustesen *et al.* (2015) and Dührkop *et al.* (2014, 2015) should be cited in section 6 ('Basic and detailed pile design: axial resistance'), in the fourth paragraph below Equation 5.
- (vi) Augustesen *et al.* (2015) should be cited in the caption of Figure 11.
