Local bond-stress–slip relationships under repeated loading*

A. D. Edwards and P. J. Yannopoulos

Figure 9 is an enlargement of part of the first diagram from Figure 8 *not*, as stated in the italic note on page 65, a diagram from Figure 6.

It follows from this that the reference in the last paragraph on page 68 to “medium load amplitude” *should read* “highest load amplitude”.

*Pages 62 to 72 of *MCR* 103.
