The home of **geotechnics**

Unrivalled authoritative research and practical application across **8 journals**

Our geotechnical journals span all aspects of international, world-leading geotechnical research. They cover all fields of soil and rock mechanics, engineering geology and environmental geotechnics. At the centre sits *Géotechnique*, the world's premier geotechnical journal, whilst *Geotechnical Research*, the newest of our geotechnical collection, is the only Gold Open Access journal in the field.

Available as single titles or as part of an ICE Engineering Journals Collection, by subscribing you receive

- Perpetual access to subscribed years
- Optional Shibboleth and Athens for ease of access
- COUNTER compliant usage reports to aid decision making
- Optional library branding
- Secure archiving with Portico
- OpenURL links and DOIs at title and article level
- KBART records for easy listing and display.
Geotechnical Research

A gold open access journal, Geotechnical Research publishes high-quality papers across all aspects of modern geotechnics, entirely free to read.

Editors: Dominic Ong, Griffith University, Australia and Mizanur Rahman, University of South Australia
E-ISSN: 2052-6156
Frequency: 4 a year

Find out more: www.icevirtuallibrary.com/gere

Geosynthetics International

An official journal of the International Geosynthetics Society (IGS), Geosynthetics International publishes current research in new technologies, design innovation, new materials and construction practice across geotechnics.

Editor: Richard J Bathurst, Royal Military College of Canada
E-ISSN: 1751-7613
2019 Impact Factor: 2.890
Frequency: 6 a year

Find out more: www.icevirtuallibrary.com/gein

Géotechnique

Widely regarded as the most important geotechnical journal, Géotechnique disseminates the highest quality research in all aspects of geotechnical engineering.

Editor: David Potts, Imperial College London, UK
ISSN: 0016-8505
E-ISSN: 1751-7656
2019 Impact Factor: 3.559
Frequency: 12 a year

ARCHIVE

Géotechnique is one of the most cited engineering journals in the world with over 9900 citations. 62% of these were to articles published before 2003 and are only available in the Géotechnique Archive and the ICE Complete Engineering Journal Archive.

Find out more: www.icevirtuallibrary.com/librarians/archives

Géotechnique Letters

Géotechnique Letters provides a forum for the rapid international dissemination of the latest and most innovative geotechnical research and practice.

Editor: Federica Cotecchia, Politecnico di Bari, Italy
E-ISSN: 2045-2543
2019 Impact Factor: 1.699
Frequency: Continuous publication

Environmental Geotechnics

*Environmental Geotechnics* addresses the growing problems related to climate change, oil and water storage, handling, storage and disposal of toxic and hazardous wastes, remediation of contaminated sites, sustainable development and energy derived from the ground.

**Editor:** Devendra Narain Singh, Indian Institute of Technology, Bombay, India

- **E-ISSN:** 2051-803X
- **2019 Impact Factor:** 1.147
- **Frequency:** 8 a year

[www.icevirtuallibrary.com/enge](http://www.icevirtuallibrary.com/enge)

Geotechnical engineering

Regularly publishing the best in research concerned with the influence of geotechnics on the built environment, *Geotechnical Engineering* is ideal for civil, structural, or geotechnical engineering practitioners.

**Editor:** Paul Vardanega, University of Bristol, UK

- **ISSN:** 1353-2618
- **E-ISSN:** 1751-8563
- **2019 Impact Factor:** 1.274
- **Frequency:** 6 a year

[www.icevirtuallibrary.com/geen](http://www.icevirtuallibrary.com/geen)

Ground Improvement

*Ground Improvement* publishes high quality, practical papers relevant to engineers, specialist contractors and academics involved in the development, design, construction, monitoring and quality control aspects of ground improvement.

**Editor:** Buddhima Indraratna, University of Wollongong, Australia

- **ISSN:** 1755-0750
- **E-ISSN:** 1755-0769
- **Frequency:** 4 a year

[www.icevirtuallibrary.com/grim](http://www.icevirtuallibrary.com/grim)

International Journal of Physical Modelling in Geotechnics

*International Journal of Physical Modelling in Geotechnics* contains the latest research and analysis in all areas of physical modelling and geoenvironmental experiments.

**Editor:** Conleth O’Loughlin, The University of Western Australia

- **E-ISSN:** 2042-6550
- **2019 Impact Factor:** 1.067
- **Frequency:** 6 a year

About ICE Publishing

Established in 1836, ICE Publishing is a leading provider of information for researchers and practitioners worldwide in the fields of civil engineering, construction and materials science.

The Institution of Civil Engineers (ICE) is an influential, not for profit, professional membership body. It provides unrivalled support to its 92,000 civil engineer members around the world. As ICE’s publishing division, our wide range of journals, archives and books provide a gold-standard reference point for industry and academia and make up the most comprehensive civil engineering portfolio in the world. We provide important financial support to help ICE to fulfil its charitable mission to “benefit society and advance the field of civil engineering”.
