Call for Papers

At a time when energy concerns and sustainability issues are high on international agendas, the role of concrete is paramount. *Magazine of Concrete Research* covers every aspect of concrete manufacture and behaviour from performance and evaluation of constituent materials to mix design, testing, durability, structural analysis and composite construction.

**Why write for ICE Publishing**

- Improve your CV and raise your professional profile worldwide
- Work is promoted globally, including to 95,000 ICE members and engineering libraries in 160 countries
- Rigorous peer review by international experts, editorial support and guidance alongside professional copy-editing, typesetting and proof-reading
- Member of COPE – Committee on Publication Ethics and CrossCheck
- Open Access publishing options available
- ICE Publishing acknowledges the best work published in our journals at the ICE Publishing Awards ceremony.

**Get started**

Think about something you or your colleagues have done recently that was particularly interesting, challenging or innovative. Start gathering data, images and references and then try writing an abstract. When you are happy with it, show it to colleagues or email it to the journal editor: jaskarn.rai@icepublishing.com

**Magazine of Concrete Research**

**ISSN:** 0024-9831 | **E-ISSN:** 1751-763X

**IMPACT FACTOR:**
- 2.026 (two year) 1.761 (five year)

**SJR:** 0.972

**AVERAGE TIME TO ACCEPTANCE:** 12 weeks

**AVERAGE TIME TO PDF PUBLICATION:** 8 weeks
**READ TOP PAPERS FROM THIS JOURNAL**

Two-part themed issue on sustainable material options for concrete

- Part 2: www.icevirtuallibrary.com/toc/jmacr/71/24

A numerical investigation of the cracking behaviour of reinforced-concrete tie elements
Reignard Tan, Max A. N. Hendriks, Mette Geiker and Terje Kanstad
https://doi.org/10.1680/jmacr.18.00156

Early-age behaviour and cracking potential of fly ash concrete under restrained condition
Dejian Shen, Wenting Wang, Qiyao Li, Panpan Yao and Guoqing Jiang
https://doi.org/10.1680/jmacr.18.00106

Predicting relative humidity of early-age concrete under sealed and unsealed conditions
Dejian Shen, Baizhong Zhou, Mingliang Wang, Ying Chen and Guoqing Jiang
https://doi.org/10.1680/jmacr.18.00068
